

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# MFM UK Primary Opportunities Fund Class P Shares

A Sub-fund of the MFM UK Primary Opportunities Fund OEIC (ISIN Income GB00B8HGN522, Accumulation GB00B905T773)

This Fund is managed by Marlborough Fund Managers Ltd

## Objectives and Investment Policy

The aim of the Fund is to provide investors with a return greater than the FTSE All Share Index over any 5 year period.

- At least 80% of the Fund will be invested in the shares of companies and investment trusts listed on UK stock markets.
- The fund may also invest in other securities whose returns are linked to the performance of a company, such as preference shares and bonds which can be converted into shares (known as convertible bonds)
- The Fund is actively managed, which means the investment manager decides which investments to buy or sell and when. The investment manager will maintain a concentrated portfolio, typically between 60-80 holdings, including small, medium and large companies operating in a range of different sectors.
- The investment manager seeks to buy good quality companies at a discount to the prevailing market price. The fund aims to take advantage of the discounts typically offered when companies are raising money or when large positions are being sold by existing investors.
- The Fund will also invest in companies on the secondary market to take advantage of depressed prices during periods of market weakness and to

ensure the Fund's assets are invested.

- The Fund will typically hold cash to enable the ready settlement of liabilities and for the efficient management of the Fund and in pursuit of the Fund's objectives. In volatile market conditions this may be as high as 20% of the fund's value although this is expected to be rare.

The performance target is the level of performance the Fund aims to deliver however there is no certainty this will be achieved.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund will be managed so it is eligible for inclusion in the IA UK All Companies sector.

The MFM UK Primary Opportunities Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation shares which means income is invested back into the Fund and reflected in the price of your shares.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

## Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund will be exposed to stock markets. Stock Market prices can move

irrationally and be affected unpredictably by diverse factors, including political and economic events.

- The Fund invests in the shares of smaller companies which are generally more volatile over shorter time periods.

- The Fund invests mainly in the UK therefore investments will be vulnerable to sentiment in that market which may strongly affect the value of the Fund.

Risks which are not adequately captured by the risk indicator include:

- In certain market conditions some assets in the Fund may be less liquid and therefore more difficult to sell at their true value or in a timely manner.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 31/01/2019. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 19-21 of the Fund's Prospectus, which is available at [www.marlbroughfunds.com](http://www.marlbroughfunds.com).

### One-off charges taken before or after you invest

<b>Entry Charge</b>	None
<b>Exit Charge</b>	None

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the fund over each year

<b>Ongoing Charges</b>	0.87%
------------------------	-------

### Charges taken from the fund under certain conditions

<b>Performance Fee</b>	None
------------------------	------

## Past Performance

### Historic performance to 31 December 2018

Past performance is not a guide to future returns.

Performance figures are calculated in Sterling on a net asset value basis and include net reinvested income. They include the annual management charge and all other Fund expenses but do not include the entry charge.

The Fund was launched on 5 January 1996.

This Share Class was launched on 31 December 2012 and first priced on 2 January 2013. In the period to 02/01/2013, past performance is represented by the Fund's A class shares.

Benchmark: FTSE AllSh TR GBP.
